

BEINGS OF THE LOCAL UNIVERSE

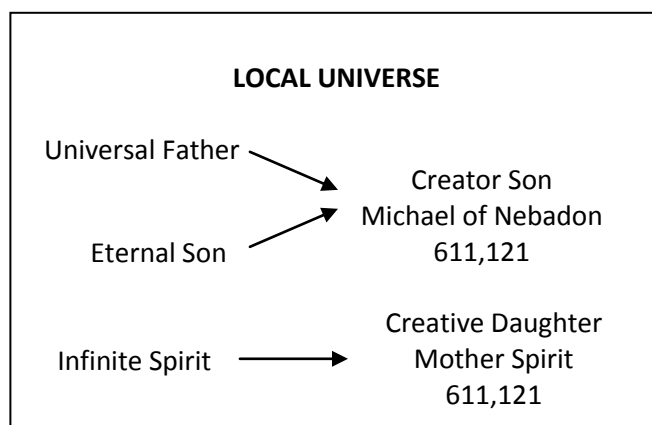

TAMILA RAGIMOVA

Physicist, Ph.D.

2007

The Universal Father rules over his vast creation, but in the Local Universe he functions through his son, called Creator Son. The Father is not personally active in the establishment and administrative matters of a Local Universe; as such matters are entrusted to his Creator Son, the local universe Creator Daughter and many of their children.

The Creator of our Local Universe Nebadon, Michael of Nebadon, is the personification of the 611,121 original concept of infinite identity of simultaneous origin in the Universal Father and the Eternal Son. [1]

The Local Universe Creator Daughter belongs to the sixth group of the Supreme Spirits, and corresponds to the number 611,121 of beings of this order. The Local Universe Creator Daughter is also known by other names like Divine Minister, Creative Spirit, Mother Spirit, Divine Daughter and in the Christian religion the name is the Holy Spirit. The Divine Minister is the daughter of the Infinite Spirit and is his representative in the Local Universe. [2]

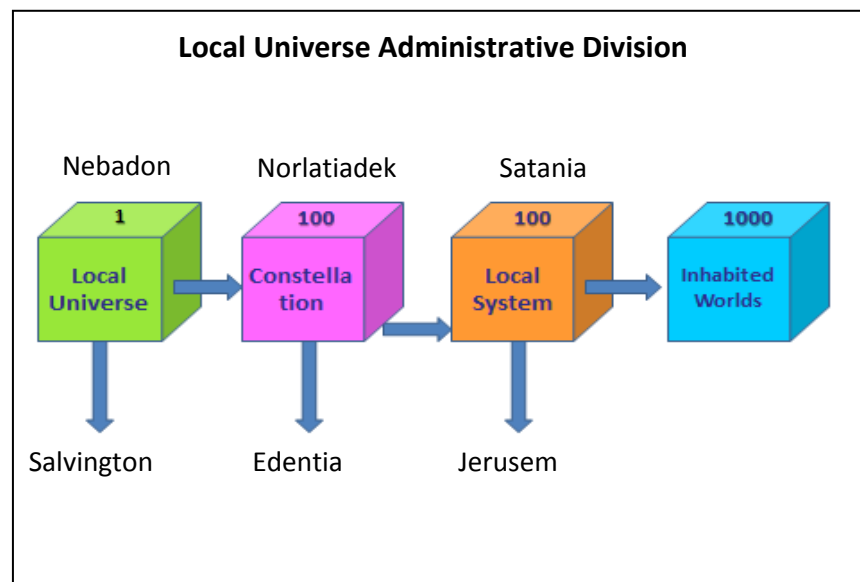

The Creator Son and the Creator Daughter are natives of Paradise and, along with other absonite beings they make the adjustment of physical formation of their Local

Universe. They are described as Son and Daughter, as male and female, just for our comprehension. In reality they are not divided into sexes. Celestial beings are divided into categories not sexes.

A Local Universe was previously planned by the Paradise Architects and its construction was originated by the special Absonite beings. Local Universes are built in a special way and are constructed by the method of "space-time".

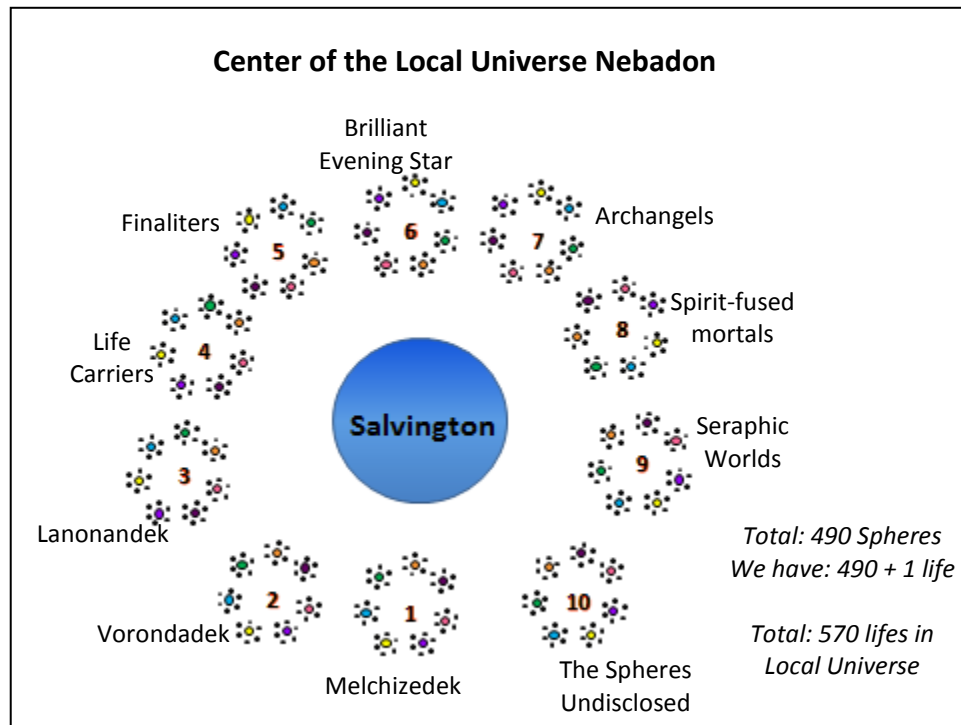

The Local Universe is administratively divided into one hundred Constellations, each constellation is divided into one hundred Local Systems, and each Local System must finally have one thousand inhabited worlds. The capital of our Local Universe Nebadon is Salvington. The capital of our Constellation, Norlatiadek, is called Edentia, and our system Satania has as its central headquarters the Jerusem sphere. As shown on Table 1.

Salvington, the capital of our Local Universe, is surrounded by ten groups of architectural spheres. Each group has seven main satellites and each satellite has six sub-satellites. In total Salvington has four hundred and twenty satellites and sub-satellites. Each group of satellites belonging to a particular order of celestial beings.

Salvington and all its satellites are described as architectural spheres, that is, they were not built by space-time method. All of them were specially planned and built with the universal cosmic energy unknown to our earthly science. These special planets do not need

suns for heating, they are heated directly by the universal energy that flows just above their surface. On architectural planets there are no volcanoes nor earthquakes, no tall mountains; they are of extreme beauty covered with many lakes and amazing flora of purple color. All architectural worlds represent a huge educational system for different type of beings: spiritual, moron trial and material. [3]

After construction of the architectural spheres of the main divisions of the Local Universe Creator Son and the Creator Daughter start creating live beings of their Local Universe.

All celestial beings created by them are divided into orders.

The celestial beings of a Local Universe were planned by the Architects of Paradise Beings by the order and the approval of the Universal Father. The created celestial beings are immortal and invisible to our eye as they are in a spiritual state not material.

The main orders of native beings of our Local Universe are:

1. Order of Bright and Morning Stars.
2. Order of Melchizedeks
3. Order of Brilliant Evening Stars

4. Order of Vorondadeks
5. Order of Archangels
6. Order of Lanonandeks
7. Order of Life Carriers
8. Order of semi-material sons, Adam and Eve
9. Order of Angels
10. Order of Midway Creatures
11. Order of Human beings

The last 2 orders are not created by the Creator Son or Creator Daughter. Human beings are not celestial as they are mortals, and they or better said us, are in a material state.

1. ORDER OF THE BRIGHT AND MORNING STAR

The first conjoint act of being creation between the Creator Son and Creator Daughter results in the creation of the highest spirit personality of their Local Universe, that is equal to them by spirituality. Only one such being of high wisdom and majesty is brought forth in each Local Universe similar to their paradisiacal parents. The name of the eldest son in our Local Universe is Gabriel of Salvington, who is the only representative of the bright and morning star order. He is the chief executive of our Local Universe based in its capital- Salvington, a being of unprecedented versatility and unimagined brilliance. Gabriel is not a creator, but is a wonderful manager; he is also supervisor of the supreme courts of Salvington. Gabriel has an able corps of administrative assistants that are undescribed to us, all of them were created especially in order to fulfill their missions. Gabriel is also the commander of "the armies of heaven" an angelic order. Gabriel and his staff are not educators, they are the administrators and the executors of the mandates of the Ancients of Days, the leaders who direct and administer the Superuniverse. [4]

2. ORDER OF MELCHIZEDEKS

The Creator Son and the Creative Spirit bring into existence the Father Melchizedek, the only being who subsequently collaborates with them to create the whole

group named Melchizedeks. Father Melchizedek acts as the chief executive of Nebadon in Gabriel's absence.

The order of Melchizedek beings, who number upwards of 10 million in our Local Universe, were all created within one millennial period of standard time, which is five thousand years of Urantia time. The Melchizedeks don't reproduce with each other, but a Melchizedek with a Mother Eve (of the Material Son and Daughter Order) create a separate class of being- the midsonite beings on special planets.

The Melchizedeks occupy the first group of Salvington satellites. In the first world of these spheres the education and spiritualizing of ascending mortals is performed. In the first satellite of the pilot world the initial planetary life of an ascending mortal is reviewed along with that of other mortals who come from the same planet. The Melchizedek engage in an extensive educational system often spoken of as the Melchizedek University and also act in all emergencies of any kind.

For example, Machiventa Melchizedek volunteered to incarnate on Urantia in the days of Abraham. It was him who Abraham spoke to and refereed to as God. At that remote time there was a danger of extinction of spirituality on our planet. Machiventa Melchizedek set the beginning to monotheism and saved humanity from many wars.

By the law of the Universal Father Michael of Nebadon has been proclaimed Planetary Prince of Urantia after he finished his bestowal on our planet about 2000 years ago as Jesus of Nazareth. Michael of Nebadon has appointed as his regent Machiventa Melchizedek to be a Planetary Prince of Urantia, however he is not currently present on earth. [5]

3. ORDER OF BRILLIANT EVENING STARS

This order of celestial beings were planned by the Melchizedeks and were brought into existence by the Creator Son and Daughter. They are also called Superangels. Brilliant stars are personal assistants of Creator Son and perform other works, such as mediators between the mortals and the Trinity Teacher Sons, Daynals, the spiritual teachers.

The Superangel corps of Nebadon is of two types, and now totals 13,641 beings, of which 4,832 were created and 8,809 are ascending Seraphim and others who have ascended

from unrevealed levels of creature life. The Superangels are visible to morontia (mansion world) beings and to certain material supermortals in the headquarters of architectural spheres.

The sixth group of seven worlds of Salvington and forty two satellites are assigned to the Brilliant Evening Stars. The created Superangels reside in the seven primary satellites, and the ascending Superangels are found in the forty-two tributary satellites.

The tributary satellites of the first three worlds serve as schools the Daynals and Evening Stars use for the training of spiritual beings. The next three groups are occupied by similar joint schools devoted to the training of ascending mortals. The seventh world with its satellites is reserved for the unrevealed joint work of the Daynals the Evening Stars and the finalizers. [6]

4. ORDER OF VORONDADEKS

The Creator Son and the Creative Spirit plan and bring into existence another great order of beings, the Vorondadeks, which are known as the Constellation Fathers. They lead the governments of the Constellations of the Local Universe. In Nebadon there are a million of these high administrators, and they, like the Melchizedeks, do not possess the power of reproduction.

Three Vorondadeks lead the Constellation government and the ruling Vorondadek is named the Most High, the other two are his associated rulers. The Most High rules for 10,000 standard years, i.e. 50,000 years of Urantia time, then the senior associate moves to occupy the post of the Most High. In total three Constellation Fathers govern for 30,000 standard years, or 150,000 years of Urantia time. The Standard year is the Salvington year which is five times longer than on Earth.

At the time of rebellion the number of directors of the Constellation increased, for example, in our Norlatiadek Constellation there are currently twelve Vorondadek managers. The second group of seven worlds with its 42 satellites of Salvington belongs to the Vorondadek, order. [7]

5. ORDER OF ARCHANGELS

Archangels are the offspring of the Creator Son and the Local Universe Mother Spirit. They are higher spiritual beings, in total there are 800,000 in the universe of Nebadon. They are not under the jurisdiction of Gabriel and are dedicated to the furtherance of the ascending career of the mortals. The Archangels are assigned as assistants to Paradise Avonal Son when he performs act of judgment over any planet. It is true, as stated in the Bible, when Avonal has finished the judgment of the planet, an Archangel called the "Archangel of Michael" enacts the call to the seraphic guardians of the sleeping souls to transport the survivors to the resurrection halls in the architectural planets of the Local System.

The Worlds of the Archangels are the seventh group of satellites encircling the Salvington worlds. Sphere number one and six tributary satellites are devoted to the history records of each mortal from the moment of his birth of the material planet, through the universe career, until he leaves from Local Universe. The Archangels have the records of persons who were "blotted out of recorded existence" by the mandate of the Ancients of Days. [8]

6. ORDER OF LANONANDEK

The order of these beings is also created by the Creator Son and Creator Daughter. The Lanonandeks have different missions but are mostly known as Sovereigns of the Local Systems, and appointed as Planetary Princes on the material worlds inhabited by mortals. On the scale of Divinity the Lanonandeks occupy the last level and are required to go through training courses in the Melchizedek University. They are not evolutionary beings, therefore they cannot attain Paradise.

In the Universe of Nebadon there were created twelve million Lanonandeks, and they do not have the ability to reproduce. They are divided into three classes: primary, secondary and tertiary. Many Lanonandeks occupy positions as messengers, custodians, archivists and form the reserve corps of Local Universe.

The Lanonandek run the risk of deviating from the universal government orders, as it was the case with Lucifer, the primary Lanonandek who was the manager of our Satania system. In Nebadon there were over 700 Lanonandeks which deviated from the way of God in the time of Lucifer's and other two rebellions. The largest of all rebellions was the one of Lucifer. This great loss of the order Lanonandek beings in our Local Universe occurred as a result of the great freedom that was given to them to manage their local systems. This is the view of the rulers of Superuniverse, the Ancients of Days.

The Lanonandek worlds occupy the third group in the Salvington circuit with a total of 49 planets for training the ascending mortals. [9]

7. ORDER OF LIFE CARRIERS

On the material worlds life does not arise spontaneously. Life is constructed according to plans formulated by the Architects of Being who are in Paradise. In a Local Universe, an order of special beings, the Life Carriers, perform planting operations of material life in those worlds equipped for life.

The Life Carriers are created by the Creator Son and the Creative Spirit and one of the three Ancients of Days. In Nebadon there are a hundred million Life Carriers and are directed by Gabriel of Salvington, the Father Melchizedek and the firstborn life carrier Nambia.

The worlds of the Life Carriers are in group number four of the satellites in the Salvington circuit. The seven primary spheres of this group are research laboratories and are designated as follows:

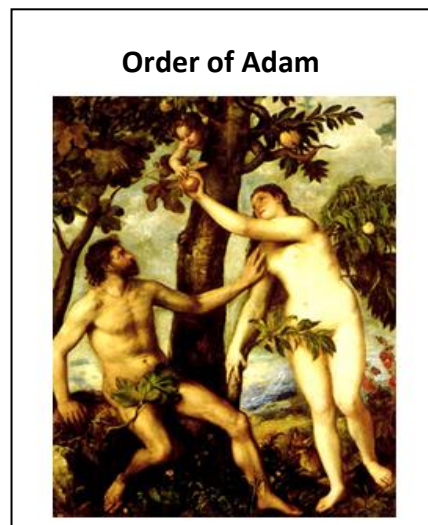

1. The Life Carriers headquarters
2. The life planning sphere
3. The conservation life sphere
4. The sphere of life evolution
5. The sphere of life associated with the mind
6. The sphere of the mind and spirit in living beings

7. The sphere of unrevealed life

In the central sphere of Life Carriers are to be found Seven Adjutant Mind Spirits, belonging to the order of the Supreme Spirits, of high degree of divinity. It is the Adjutant Mind Spirits that help humans develop thinking. The way they communicate with the material brain of live beings remains a secret of Divinity. [10]

8. ORDER OF SEMI-MATERIAL BEINGS, ADAM AND EVE

Adam and Eve are semi-material beings of different gender. They are able to reproduce. The Creator Son only produces one couple of Adam and Eve in each local system. In our Satania system they reside in its capital Jerusem. In this morontial planet the original couple gives rise to a large family of Adams and Eves.

In Jerusem the children of the original couple are immortal and in the future they will be sent to the evolutionary planet, where they create new planetary race, called Adamic or Violet race.

Planetary children of Adam and Eve can mix with the humans of animal origin, and by doing so they improve the physiology of the human race. Initially, there is no reproduction between adamic children and human races. In general they began mixing with the human animal races only when there were a million beings of the violet race.

Adam, Eve and their planetary children are visible to humans. The Life Carriers, by design, deprive the children of Adam and Eve from immortality when born in an evolutionary planet; although these children live hundreds of years on the planet and then die.

In a planetary mission Adam and Eve live indefinitely long, but their children experience a decrease in longevity in each subsequent generation. Adam and Eve could mate with mortals, but this function, the procreating with animal origin beings is left to the progeny of the Planetary Adams. They are biological elevators and their blood improves the resistance of the human body to different diseases.

For the transit of Adam and Eve there is a technique of dematerialization of their bodies and transport from Jerusem to the evolutionary worlds. This transit is performed by Seraphim transporters. When they reach their destination the Material Sons are rematerialized under the direction of the Life Carriers. This process takes from ten to twenty-eight days of Urantia time. When the reassembly of the physical body of the Material Sons is completed, they are again the same as they were before in Jerusem.

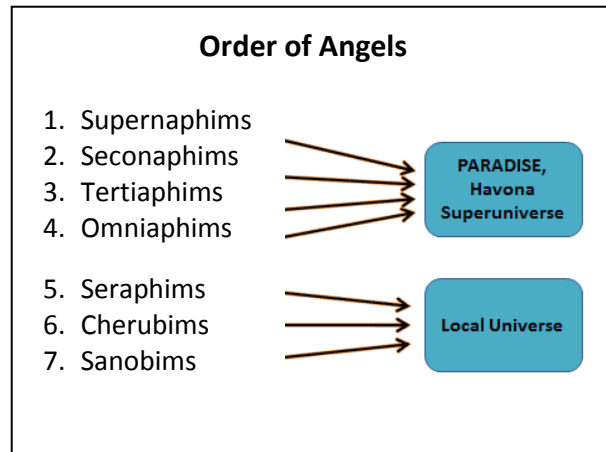

Adam and Eve vary in height from 2.4 to 3 meters and their skin has a bright violet color. Through their bodies circulates material blood but of different form from that of humans, also their DNA is much more sophisticated.

On the material planets, Adam and Eve, and their large family live in the Garden of Eden, so named in honor of Edentia, the capital of the Constellation of Divine beauty.
[11]

9. ORDER OF ANGELS

Beings of the Angelic order are ministering spirits who are found from Paradise to the evolutionary worlds of space and time. The angels of all orders have distinct personalities and are highly personal. They all have a large capacity to corporate with the different celestial beings. The Ministering Spirits of the Great Universe are divided into the following classes:

1. The Supernaphim
2. The Seconaphim
3. The Tertiaphim
4. The Omniaphim
5. The Seraphim
6. The Cherubim
7. The Sanobim

The first four orders were created in the Central Universe and serve in Paradise, Havona and in the Seven Superuniverses.

The Seraphim, Cherubim and Sanobim belong to and work in the Local Universe.

The Seraphim are linked to the program of mortal ascension and also monitor the progress of an evolving planet. The design of the Seraphim is fairly uniform across the Seven Superuniverses. These Angels are created by the Creator Spirit and since the Local Universe of Nebadon is still forming, the Creator Spirit continues her activity of the creation of angels. The Angels are not sexual beings, they do not reproduce themselves. They are very close to mortals and understand the mode of life of human beings, appreciate music, art, and true humor. The Angels always act in pairs, one is positive the other is negative with respect to the universal energies that feed them. [12]

The seraphic worlds occupy the ninth group of seven primary spheres of Salvington. The primary sphere is surrounded by six satellites where the schools of seraphic capacity are found. Rest of spheres are occupied by angels undisclosed to humans. [13]

With the arrival of the first Thought Adjuster in an inhabited world, the first Guardian Angels also appear. After a physical death they become the keepers of the immortal soul. They are essential for the renewal of life so that a human can become a morontia being after death. [14]

SERAPHIC ARMY					
No.	Name	Division Number	Number Of Pairs	Number Of Seraphim	Leader Name
1	Group		12	24	Chief
2	Company	12 Groups	144	288	Leader
3	Batallion	12 Companies	1.728	3.456	Commander
4	Unit	12 Batallions	20.736	41.472	Director
5	Legion	12 Units	248.832	497.664	Supervisor
6	Host	12 Legions	2.985.984	5.971.968	Archangels
7	An Angelic Army	12 Hosts	35.831.808	71.663.616	Brillant Evening Star

The Angels are a seraphic army and our creator Michael of Nebadon is Supreme Overlord of angels and Gabriel of Salvington is the supreme commander of the army of heaven. The angelic army is organized as follows: [15]

The Seraphims of the Local Universe are classified into the following seven groups:

1. Supreme seraphim
2. Superior seraphim
3. Supervisor seraphim
4. Administrator seraphim
5. Planetary Helpers
6. Transition Ministers

7. Seraphim of the Future

Each group is divided into seven subgroups. [16]

The Guardian Angels are seraphim who are engaged in ministry to mortals for spiritual elevation, improvement, and progress that can bring a mortal to cosmic survival.

Since the bestowal of Michael of Nebadon, a seraphim is assigned individually to every human in accordance with that human's intelligence, spirituality and destiny. [17]

Cherubim and Sanobim. They are helpers to the Seraphim and generally work in pairs. The cherubim is positively charged and the sanobim negatively charged as to the universal energy that they feed of. Cherubim and sanobim are spiritual workers on the material worlds like Urantia; they cannot function as guardian angels for human beings, that is a privilege only of the seraphim. The cherubim and sanobim are very close to the morontia level of existence and therefore are efficient in the work of the material, morontial and spiritual levels. [18]

They are always involved in training and looking for new achievements in perfection. Some bright cherubim and sanobim, thanks to their experiential development, become seraphim, but others remain in their status up to the times of full emergence of the Supreme Being. The embrace of the Mother Spirit to the ascending sanobim and cherubim transform them into fully developed Seraphim. [19]

10. ORDER OF MIDWAY CREATURES

The Midway Creatures are permanent citizens of the material spheres. As they do not die. On our planet there are two distinct orders: primary and secondary. These unique beings exist in a living state that is between those of the mortals and the angels, hence the name midway creatures.

The Primary Midway Creatures on Urantia originated by a different technique than found on other worlds; their appearance was performed by an unusual method of an interplay between the material and the spiritual.

The one hundred corporeal members of the entourage of Planetary Prince Caligastia arrived 500,000 years ago. They were super-material beings without breeding privileges, but at the same time 50 male and 50 female beings were sexual creatures possessing the vital plasma material of the humans of Urantia. The super-material (non-sexual) union of a man and a woman of the corporeal staff resulted in the appearance of the firstborn of the primary midway creatures. [20]

The Planetary Prince authorized each pair of these special beings of the corporeal staff, the procreation of these special beings, and thus there was born a body of midway creatures which proved very useful in the work conducted by the administration of the Prince.

The process of creation of midway creatures began thirty-three years after the arrival of the Prince and his entourage on earth. Each pair produced a child, one midway being, in a period of 6 months and when this couple begat 1,000 children no more were born. In total, 50,000 midway beings were born between all pairs of the corporeal staff. They are immortal, invisible to human eye and very helpful to the evolution of humans and planet in general.

The Midway Creatures are fed with the universal energy and are able to develop the ability to influence human society. 200,000 years ago most of these primary midway beings sinned during the Lucifer rebellion: of the 50,000 beings, 40,119 joined Caligastia, who led [21]

The Secondary Midway Creatures were born of the union of Adamson, the firstborn son of Adam and Eve and Ratta, who was a descendant of the nodite race. This occurred approximately 37,000 years ago.

The nodite race was founded on earth by the following way: after the begging of the rebellion, members of rebel Caligastia entourage began to procreate in a sexual way. This is how a new race of humans was founded, they were by far superior to humans of animal origin. [22]

Adamson and Ratta had sixty seven children. Every fourth child born was at times invisible, altogether there were 16 male and female unusual beings. Marriage among them produced a new order of secondary midway creatures. In total 1,984 midway creatures were

born in a period of a hundred years. Never in the history of our Local Universe had occurred a similar procreation. [23]

The 16 invisible children of Adamson and Ratta lived and died on earth, but their midwayer children were fed universal energy and continued to live without being subject to the limitations of mortal flesh.

Of the 1,984 secondary intermediate beings, 873 joined the Lucifer rebellion. Before the day of Pentecost, these disloyal beings could be seen to mortal eyes and could take possession of a human mind, but after the bestowal of Christ Michael and the outpouring of the Spirit of Truth, these rebel midway creatures lost their ability to influence the human mind. Since then, both midway rebel groups are detained on the Jerusem satellites. [21]

The loyal midway creatures are permanent citizens of Urantia; they do not sleep, do not reproduce, are evolutionary and are very close to mortals. They have the ability to be transported by the circuits of universe energy to other worlds, but they do not because they have chosen to stay on their planet, working for its development until it reaches the status of light and life. [24]

The 1,111 loyal secondary midwayers are engaged in important missions on Earth, and are the personal links with the Fate of the Reservists of the planet. It was these midwayers who encouraged the supervisors of our planet to produce the fifth epochal revelation, which was later published as The Urantia Book.

11. ORDER OF HUMAN BEINGS

Terrestrial life on the planets of the Universes of space and time is not accidental, it is strictly determined by the laws of the Univese. Life is planned by the Heavenly Architechts and is planted by Carriers of Life. In each local system there are some original basic models of plant, animal and human lives. The Life Carriers modify these basic models in their laboratories to suit the physical conditions of each planet. [25]

There are seven types of physical human beings in our local system Satania:

1. Atmospheric types
2. Elemental types
3. Gravity types
4. Temperature types
5. Electric types
6. Energizing types
7. Unnamed types

In addition to this basic classification, there are numerous intermediate groups that remain unspoken of.

1. The Atmospheric types. The atmosphere of a planet determines the type of mortals that can develop under these conditions. There are sub-breathers, super-breathers, and midbreathers (the Urantia races). On a planet without an atmosphere, there can live intelligent, non-breathing humans. In Satania there are only 1.5 % of inhabited planets where the beings do not breathe, and such a sphere is in close proximity to Urantia. [26]

2. The Elemental types. There may be different types of human beings, those who live on land are called terrestrial beings like us. There are also winged types that can live in the land but can also fly. In general, this type of being develops on planets as super-breathers. There are also beings that live in water. In Satania only 7% belong to the water type, 10% to air type, 70% to the land type and 13% are combined between ground and air types. [27]

3. The Gravity types. The height of mortals varies depending on the size of the planet, i.e. depends on the planet's gravity. In Nebadon the average height of mortal is 2 meters. Very large worlds are populated by short beings of 75 cm, and small planets have tall beings with a height of 2.5 meters. [27]

4. Temperature types. It is possible to create creatures that can withstand very high and very low temperatures compared to the temperature of Urantia.

5. The Electric types. There are ten kinds of designs of mortals to withstand the electrical and magnetic conditions of a planet.

6. The Energizing types. There are six types of vital universal energy nutrition for humans: the sub-breathers employ the first type of nutrition, the marine inhabitants the second, the mid-breathers belong to the third type of breathers, as we are. The super-breaths employ the fourth type of vital energy intake, the non-breathers utilize the fifth type nutrition of energy. The sixth technique of energizing is only used by the midway creatures.

7. Unnamed Types. There are numerous additional physical variations in planetary human life. The Life Carriers make changes to the human anatomy and physiology. They may change the electrochemical processes of the body of a mortal. These distinctions of the body do not affect the intellectual or spiritual life of a human being. [26]

12. HUMAN RACES

There are big differences between mortals on different worlds, but all terrestrial humans have power of will, are of animal origin, are erect beings with two legs.

There are six basic colored evolutionary races; three primary: red, yellow and blue, and three secondary: orange, green and indigo. Most of the inhabited planets have all these races, but some have only three primary types.

Humans on other worlds can have three basic types of brain mechanisms. There are beings with one brain, two brains, and three brains. In our languages, the brains are referred to as hemispheres. The two-brained beings, like us on Urantia, are more inquisitive, more adventurous and philosophical than humans with one brain, but less spiritual, less ethical, and less God worshipping than humans with three brains.

All beings with different brains have the same kind of vital plasma and carry out activities in a very similar way to the Urantia humans. All go through the same intellectual levels and through similar spiritual tests. The progress of humanity depends heavily on the planetary age, the work of the Planetary Prince and his entourage, the biological lifting by Adam and Eve, and the bestowal of the Daynals that visit planets on occasion .

Urantia deviated from this Divine path, but our planet had the special honor of receiving the Sovereign of our Local Universe, the Creator Son, Michael of Nebadon. [28]
