the Universe,
Jesus, and ourselves

The Urantia Book

“The universe is neither mechanical nor magical; it is a ✨ creation of mind and a mechanism of law. ✨ The universe is mind planned, mind made, and mind administered.

But this mind is neither material, mind nor creature mind; it is spirit-mind functioning on and from creator levels of divine reality”

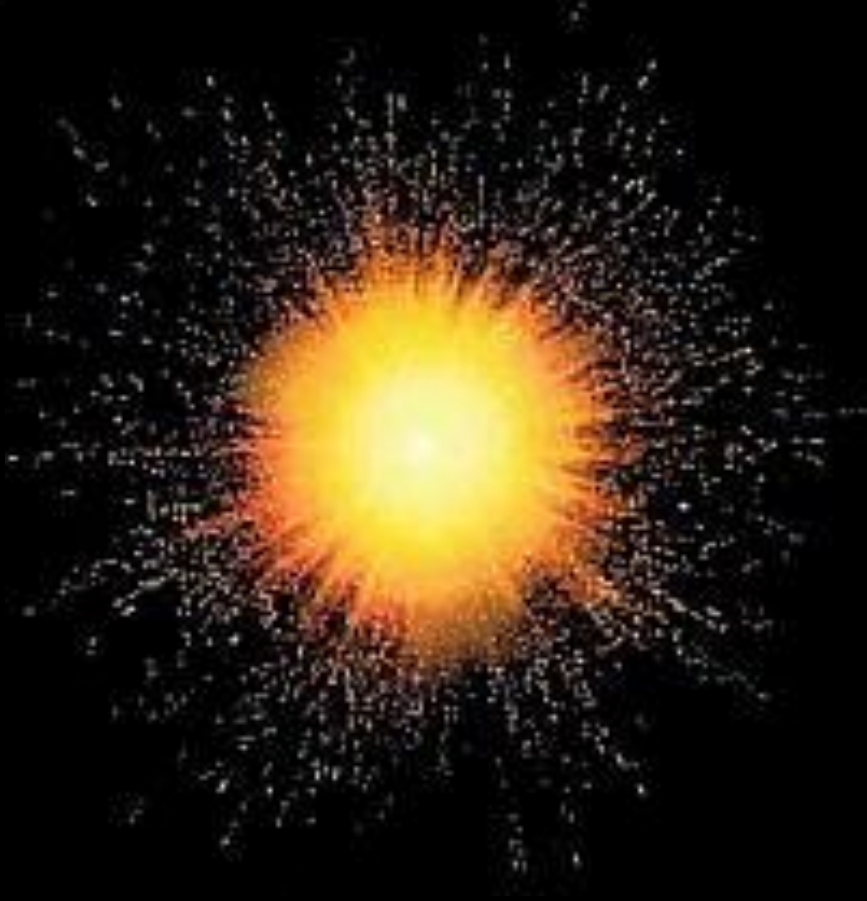

Big Bang

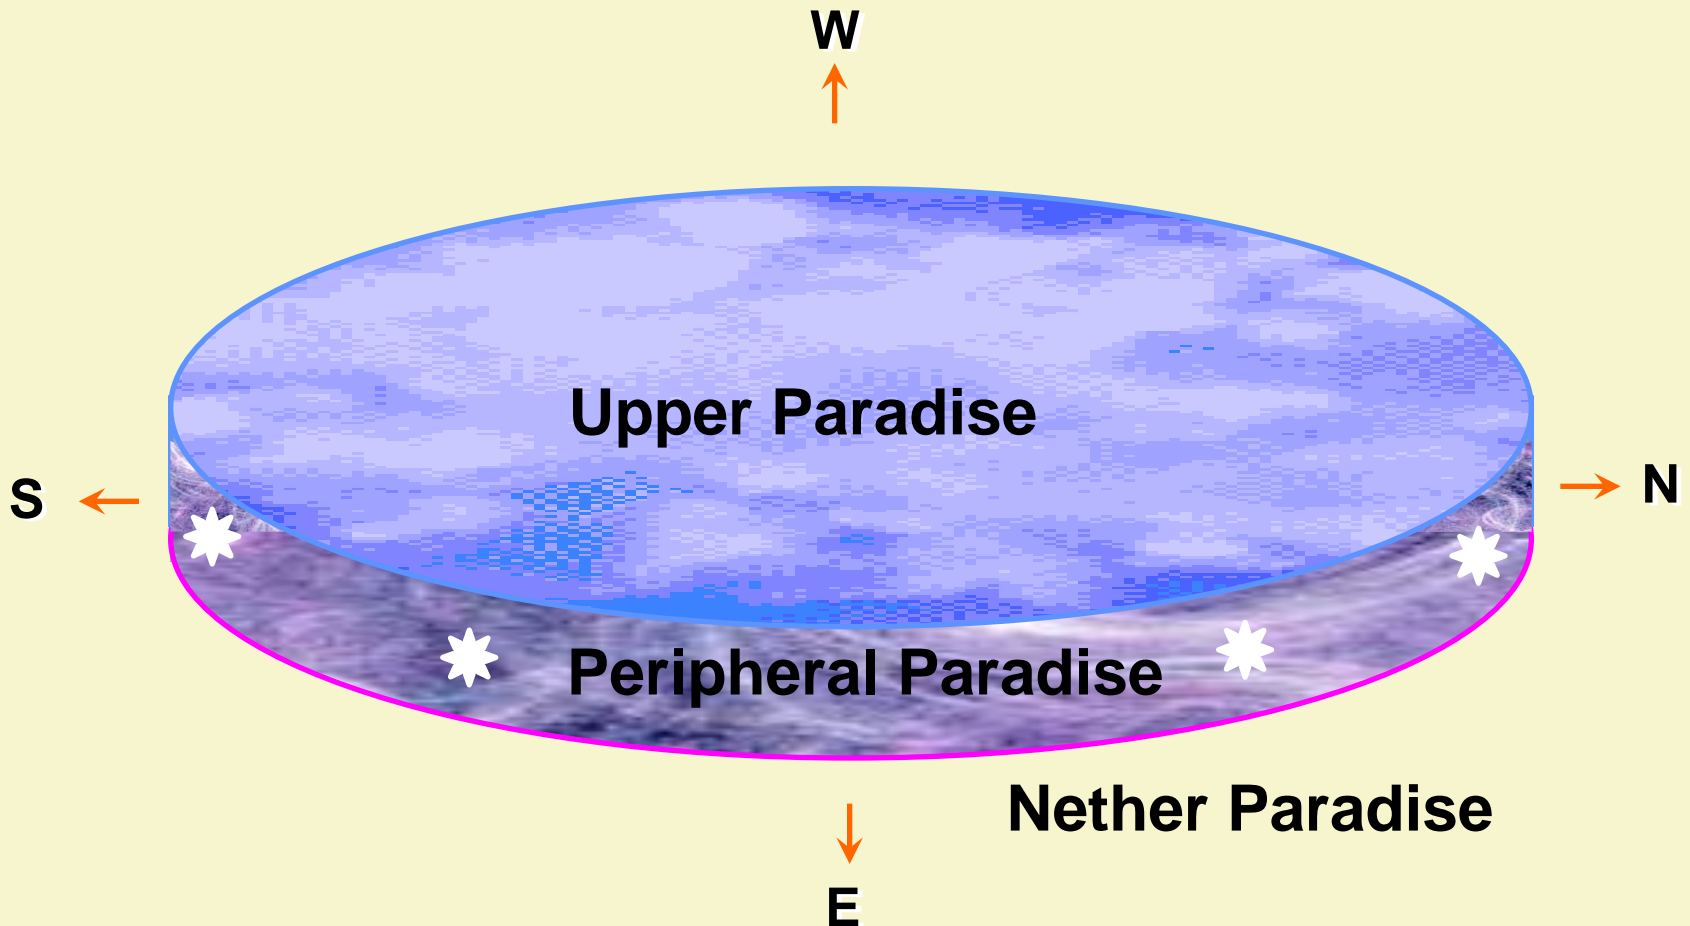

It is impossible to describe the apparition of the Universe using either particle physics or even the most advanced mathematical calculations from the Big Bang theory.

Why?

Because our universe is composed of substances and energy which are yet unknown on our planet.

The Paradise

Absolutum - substance
Cicle of pulsation $\sim 2 \times 10^9$ years

$$D = d + \frac{1}{6}d$$

$$h = 0.1d$$

The Attributes of Paradise

1. It is definitely ellipsoid and essentially flat.
2. It appears to be static, and is unique in the cosmos.
3. It is outside the realm of time and space.
4. It is composed of a single form of materialization; a substance known as ABSOLUTUM.
5. Upper Paradise is the divine residence of the Universal Father, the Eternal Son and the Infinite Spirit.

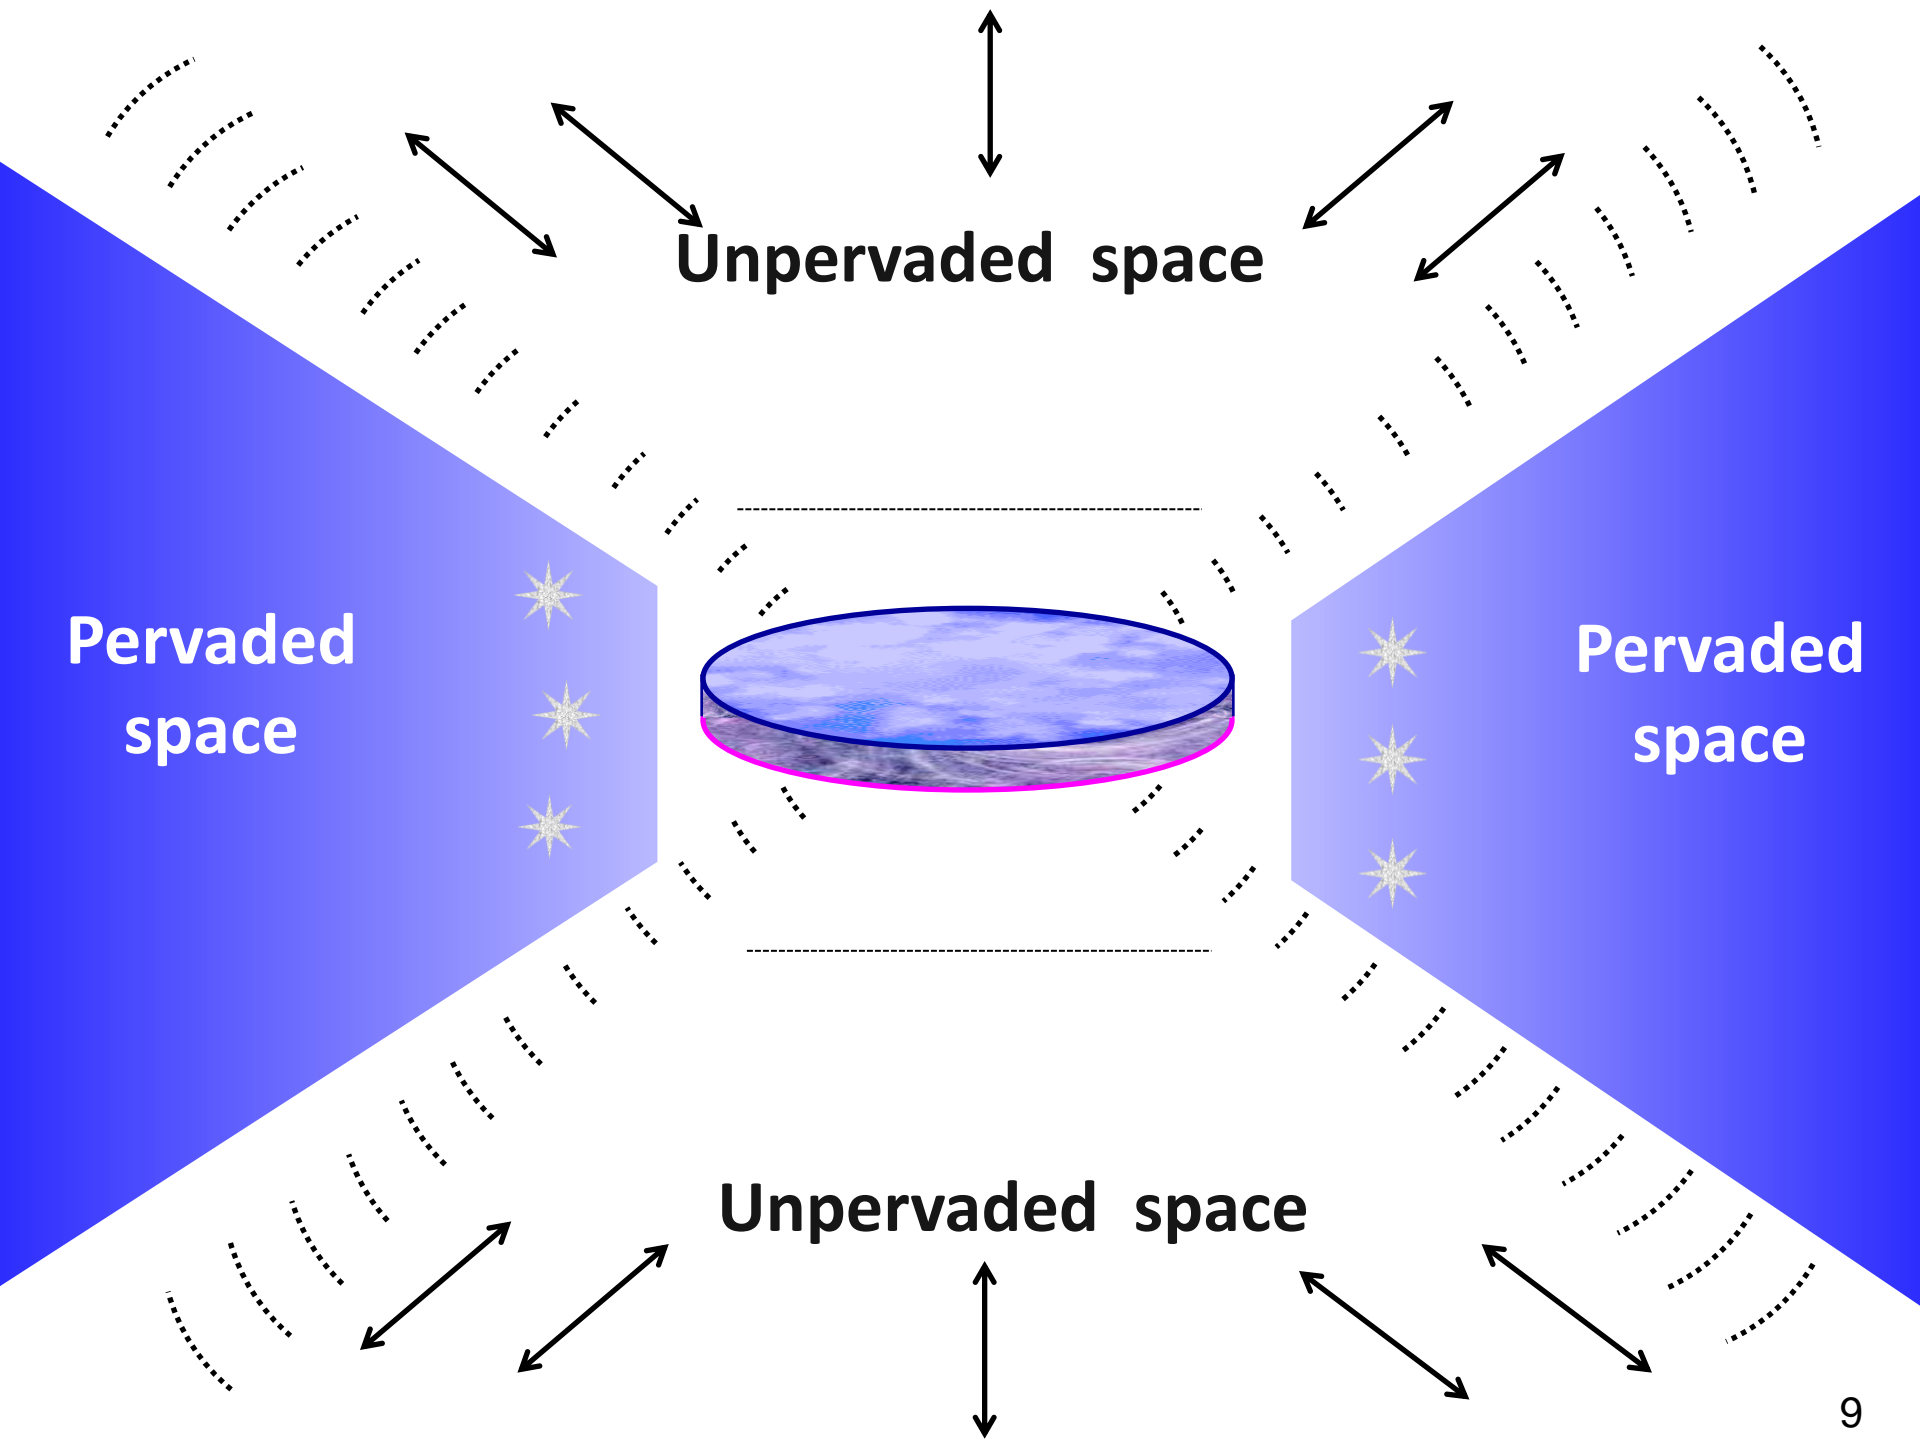

The Attributes of Paradise

6. Peripheral Paradise is partly Pervaded by landing and dispatching fields for spirit personalities like transport superaphim. It is also the location of the seven flash stations for certain Paradise energies going forth to the seven superuniverses.
7. All physical force, energy, and matter are one. All force-energy originally proceeded from nether Paradise.
8. The Isle of Paradise is the focal point of absolute material gravity. Every known form of cosmic reality is subject to the great ellipse.
9. Paradise is surrounded by 21 satellite bodies from the three rings.

Creation of the Universe

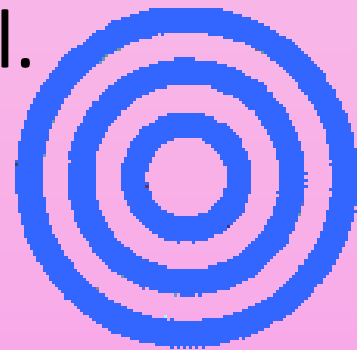

The universe was originally, projected and Planned by the Paradise Architects of the Master Universe. It was built in stages by celestial beings starting from Paradise outwards and always under the mandate of the Universal Father.

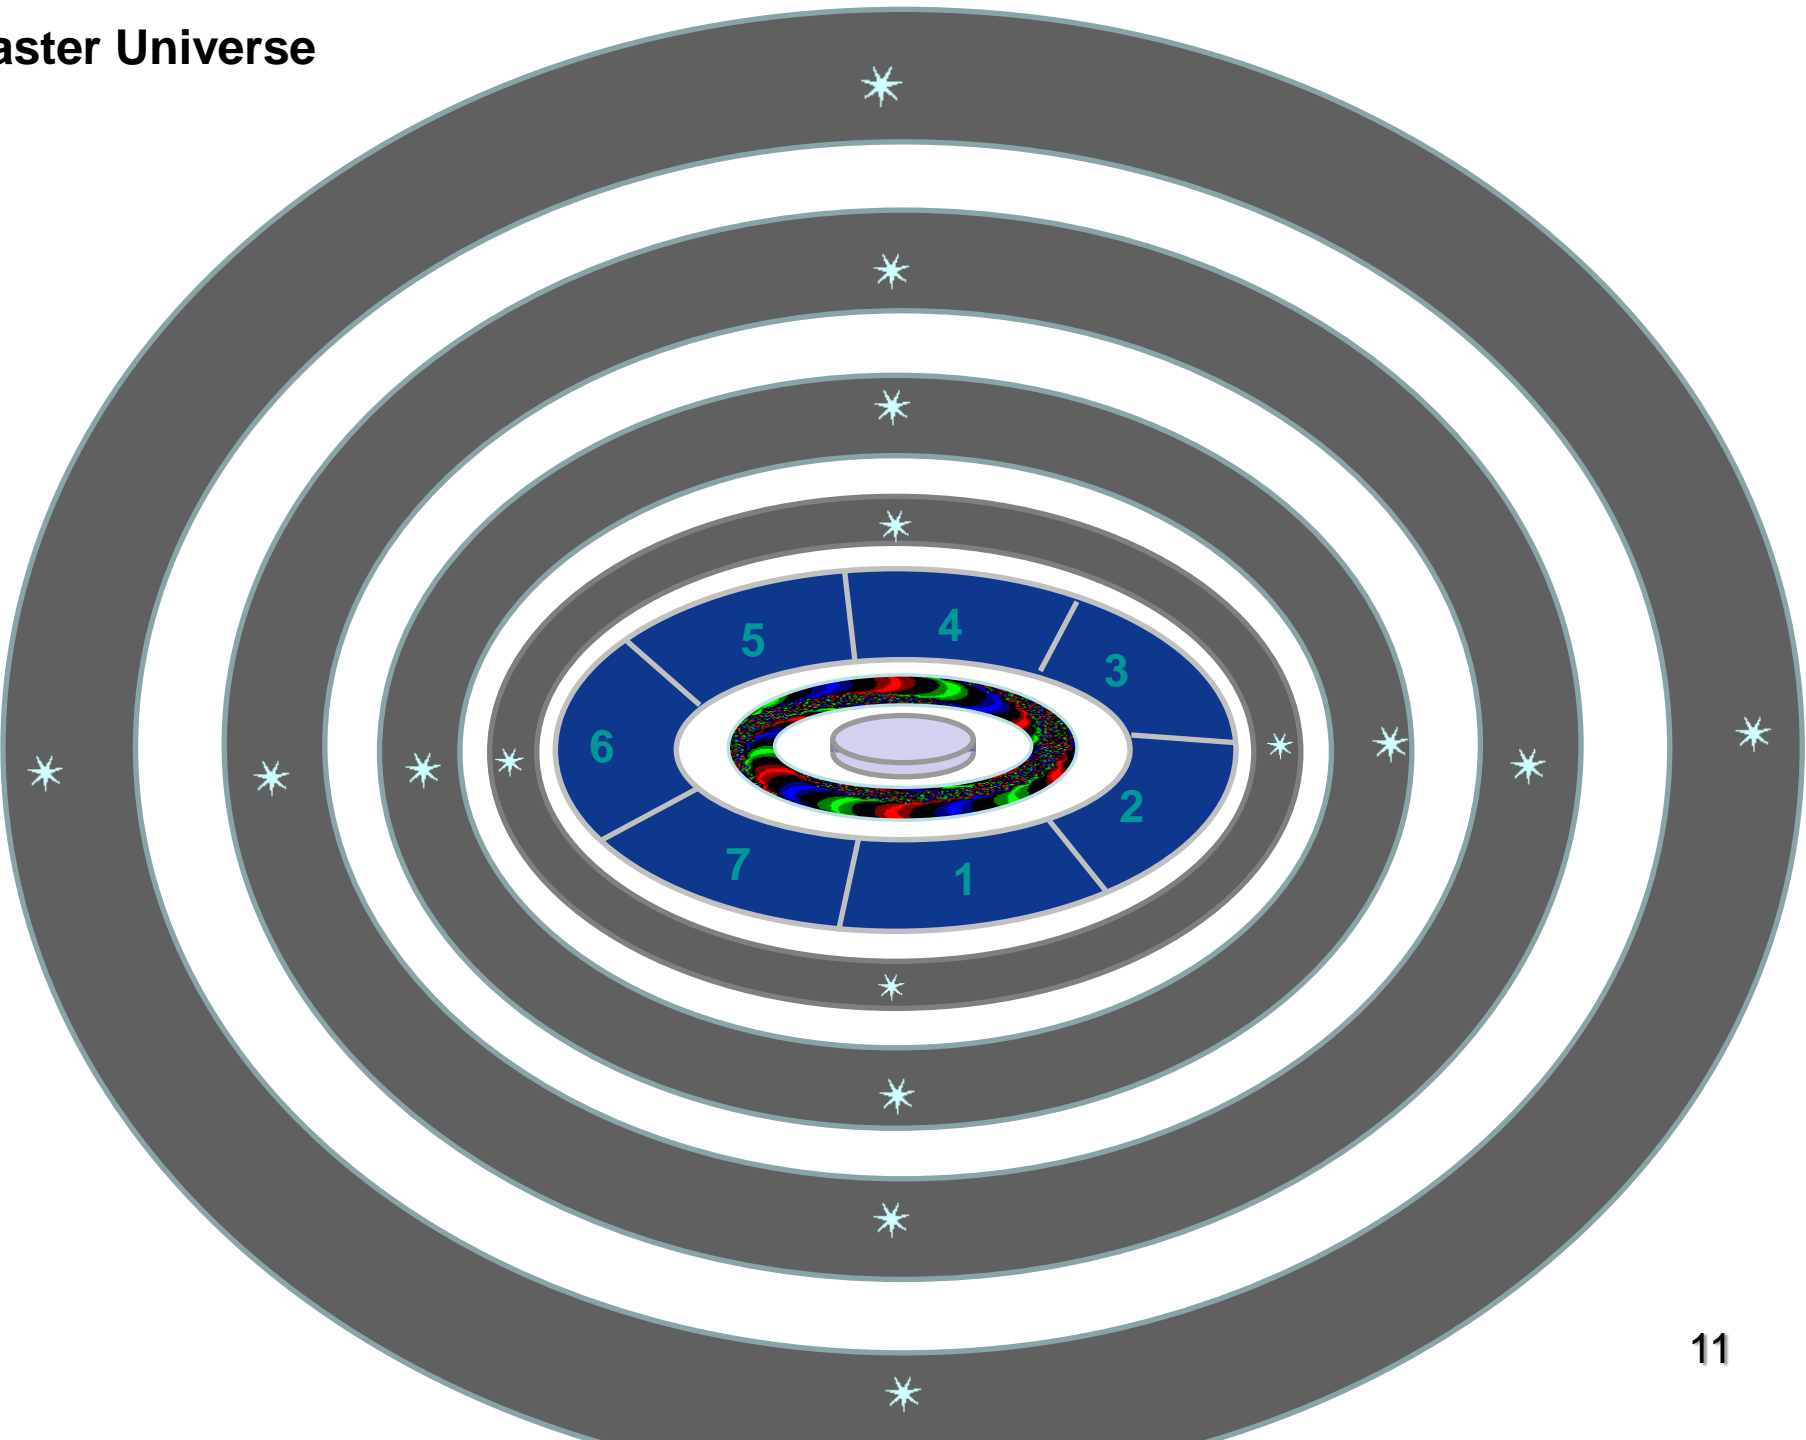

Six Space Levels

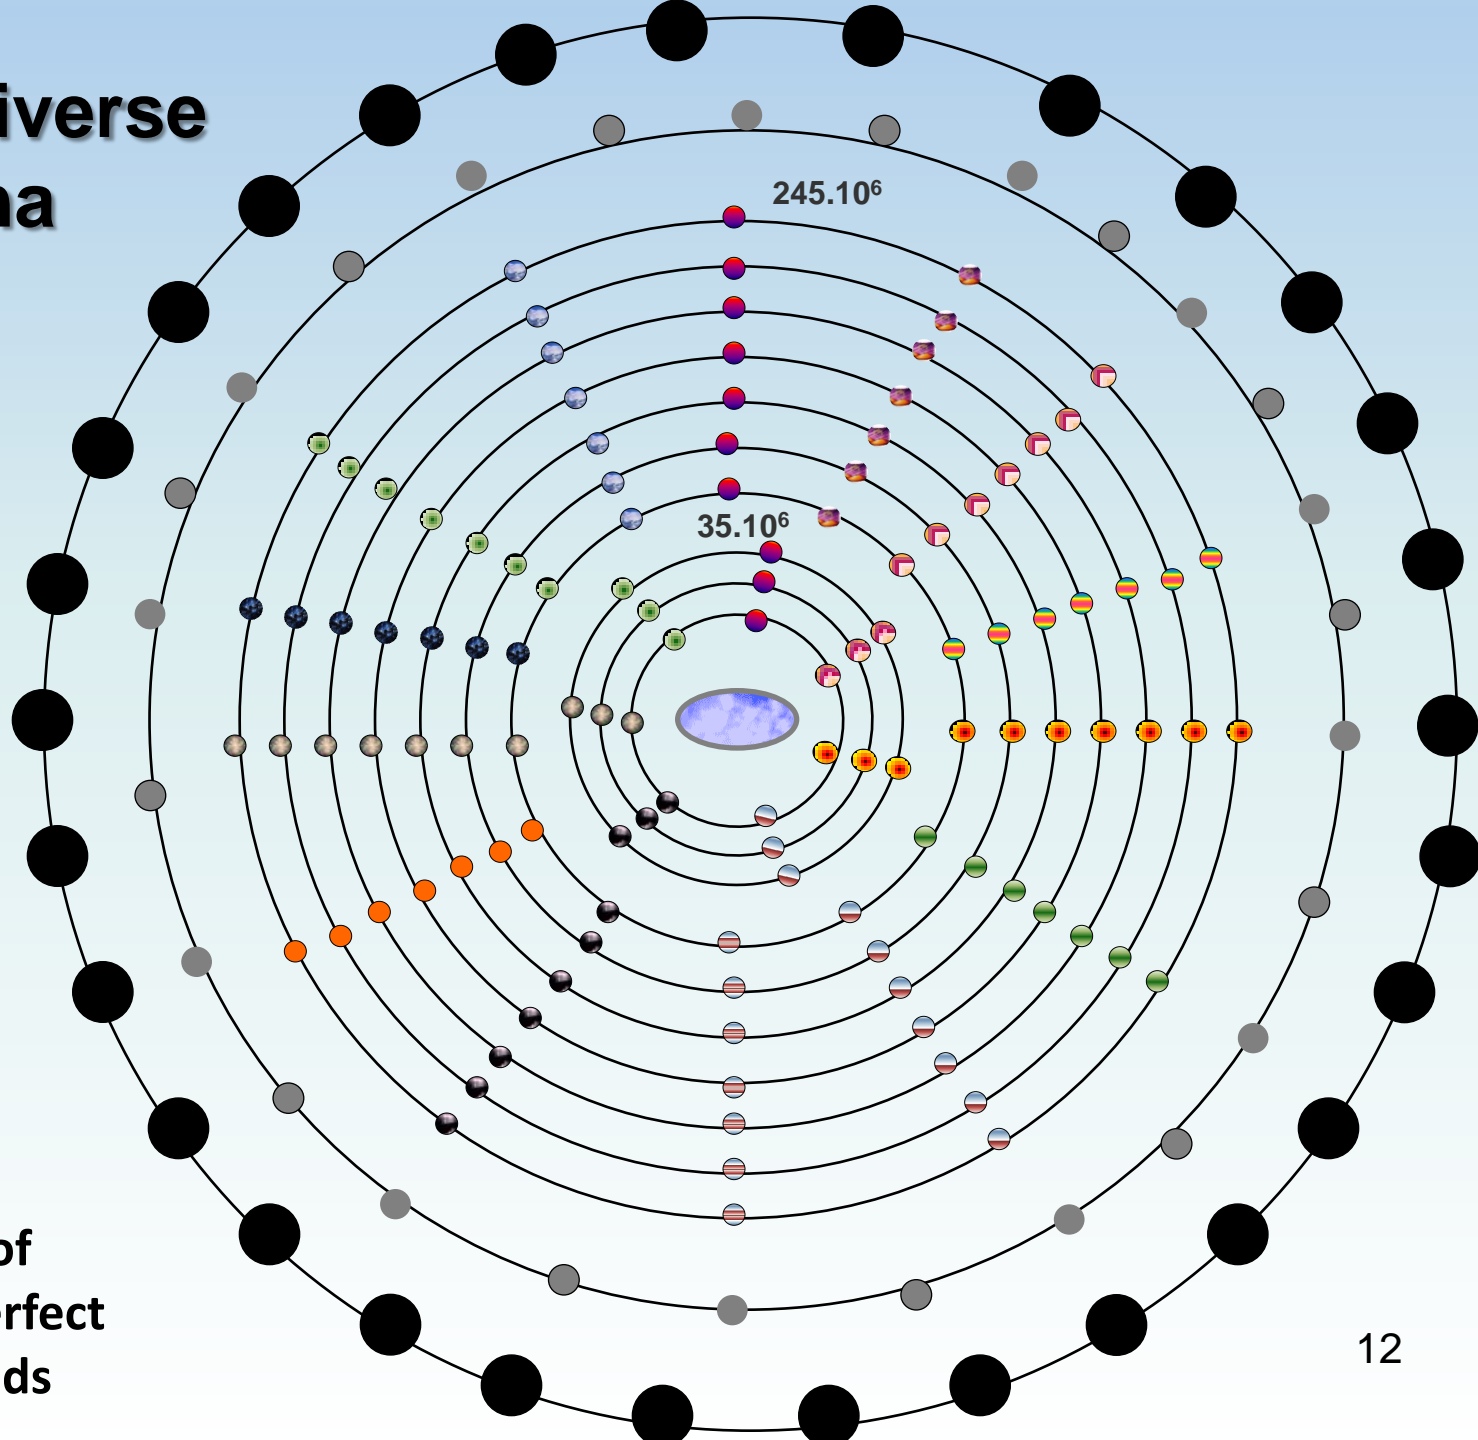

1. The Central Universe--Havona.
2. The 7 Superuniverses of Time and Space.
3. The First Outer Space Level.
4. The Second Outer Space Level.
5. The Third Outer Space Level.
6. The Fourth and Outermost Space Level.

The Creation of the Seven Superuniverses

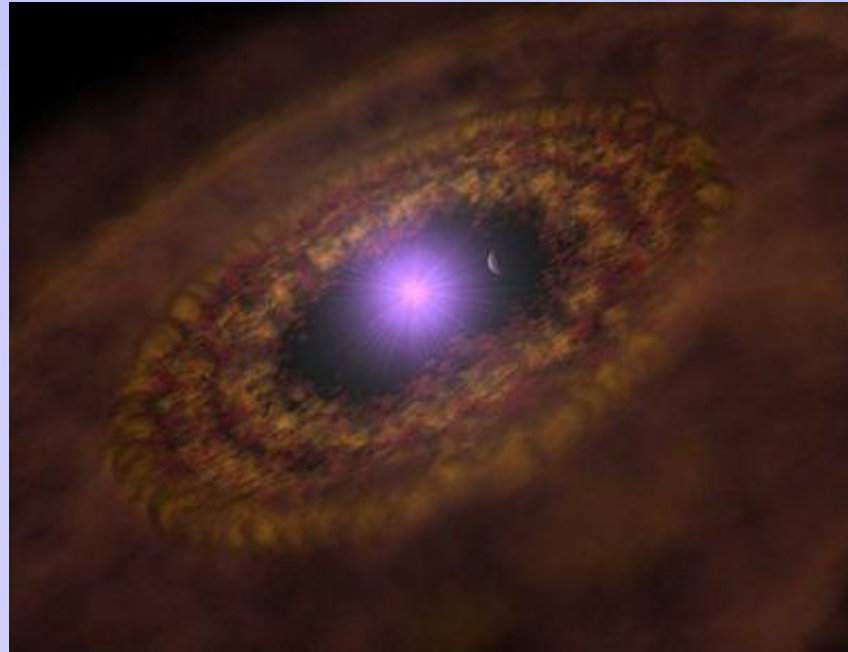

The method by which the seven Superuniverses were created is known as:

TIME – SPACE TECHNIQUE

It includes cosmic concepts such as:
Absoluta, Segregata, Ultimata, Gravita

The are transformations within a nebula

Absoluta or Space Potency

- It's a pre-cosmic reality; it is the domain of the Unqualified Absolute.
- The phenomena of Nether Paradise is composed of three zones of action of primordial force.
- These three zones are presented as three concentric circles of cosmic reality.

Segregata or Primordial Force

It's the first basic change (or transformation) of space potency.

Segregata reacts to the initial movement of primordial force which is activated by the Universal Father.

Ultimata

Force Energy: Begins responding to Paradise gravity or universal gravity.

Gravity Energy: Responds totally to universal gravity and begins the response of linear gravity.

Gravita or Universal Energy

- Responds to both types of gravity and can be managed through energy channels.
- Has 30 phases of existence.
- The first materialized particle of Gravita is known as the ULTIMATON.
- There are 100 ultimatons in an electron.

Secrets of the Universal Father

The transmutation of cosmic force into universe power is a secret of the Universal Father. Nebadon Melchizedeks have long ago labeled this phenomenon as one of the seven:
Infinities of Divinity

Special beings perform the following transformation within the nebula:

Absoluta \Rightarrow Segregata \Rightarrow Ultimata \Rightarrow Gravita

Ultimata \Rightarrow Ultimaton \Rightarrow Particles
 \Rightarrow Atoms \Rightarrow Matter

Transformation of Nebula

Four Phases

1. The circular cloud shape.
2. The shape becomes Helical.
3. The suns (stars) begin to scatter.
4. The final phase of star discharging.

Each phase of nebulae development could last billions of years.

Magellanic Cloud

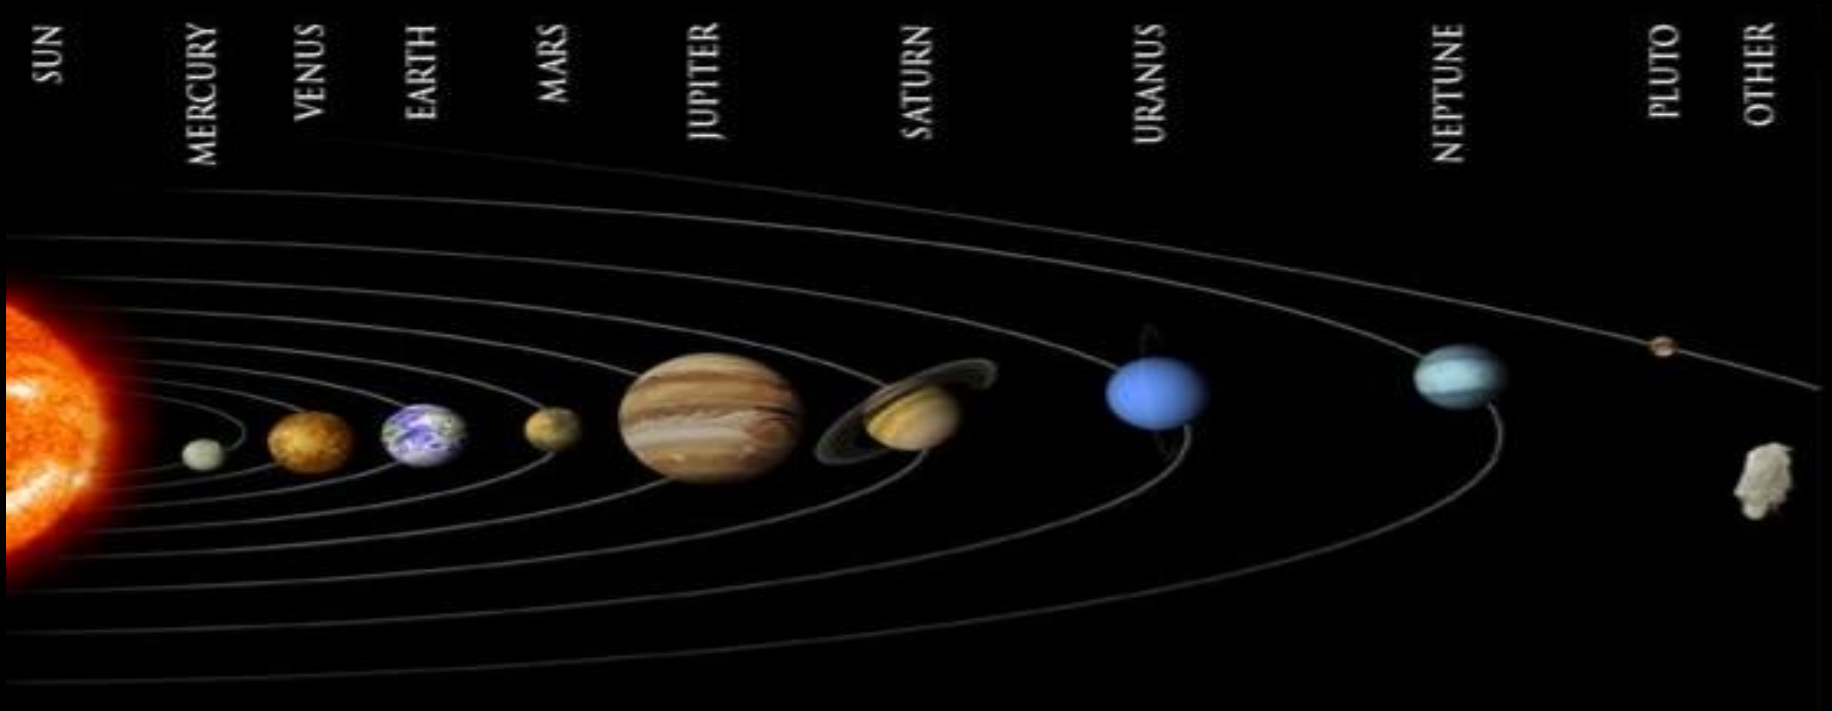

This nebula is now in the fourth stage of development and is at the outer limits of Orvonton.

Galaxy Andromeda

- This nebula produce aproximadly 100'000.000 sun and oneself encounter now fence of limits Orvonton.
- The light of Andrómeda that observe in the earth leaved the stars 1'000.000 years ago.

Monmatía

- Our solar system, Monmatia, originated from the Andronover Nebula which was born aproximately 857'.000.000.000 years ago.
- This nebula gave birth to 1'013.628 suns.

Orion and Sagittarius

The headquarters of our system Satania Jerusem apparently is in the Orion star cluster.

The headquarters of our minor sector is in the Sagittarius star cloud.

Orion cumulus

Sagittarius Cumulus

Arquitechatural Spheres

- These spheres were built using several specialized techniques and do not rely on solar energy to keep them warm.
- They seem invisible to our eyes and telescopes because they do not radiate light .
- They control and regulate Gravita Universal Energy.

The Urantia Book

“The spiritually blind individual who logically follows scientific dictation, social usage, and religious dogma stands in grave danger of sacrificing his moral freedom and losing his spiritual liberty. Such a soul is destined to become an intellectual parrot, a social automaton, and a slave to religious authority.”
